Meeting Minutes Taken on 28th April, 2008 at 1400 hours

Attendees: Callum, Alex, Ming, Filimoni, Ken, Cui, Hemant, Mohammed, Hill, Keane, Ida, Jon, David & Ming

Excused: Hill, George

Late: Sahil

Next Meeting: 05/05/2008 (Monday) @ 1400 hours

Contents:

1. Minutes on 10th April, 2008 Reviewed
2. Milestone 2 (M2) Planning
   - Timeline
     - David commented would like the sprint to be shorter.
       * Consider the work hours of each members- each group has 3 MSE + 2 BE(SE) members
     - Ming initially suggested 6 hours due to the advice given by Matthew on the tickets picked for M2 can be challenging.
     - David's aim for this sprint is to get some basic functions of the tickets working rather than has nothing for 6 weeks.
     - Ming suggested to split the tickets into smaller tasks that might take more time.
     - An agreement was reached by the group to have have the tickets' basics done by 25/05/2008 instead.
   - Tickets briefing and assignments
     - Ticket 27 (MIME-type) to be completed by G3
     - Ticket relations
       * 23, 42, 40, 169: searching files using RSP conventions and file plugin
       * 146: continuous testing on the repository
       * 138: search filters query optimization
     - David: Break the tickets by functions instead. For example, one subgroup to work on the database, another subgroup to work on the search plugins.
     - Ming: All tickets (except 146) will need to be worked simultaneously.
     - Alex: Have to know what is needed before splitting into tasks for groups.
     - David: Get the Configuration Management stuffs ready
     - Assignments:

* G1: 146, 138
    * G2: 42, 169
    * G3: 23, 40
  - Ken: Have the subgroups brief the rest of the members on the findings after the investigation

3. Git

- David: NEED TO GET THIS UP ASAP!
  - Possible to have a multilayered repository
  - Each person should commit as often as one can
- Git repo structure:
  - RSP/earth
    * SEGP/earth (fork)
      · group1/earth (fork)
      · group2/earth (fork)
      · group3/earth (fork)
      · *(Each member clones from their own respective subgroup)*
- Alex was assigned to look into setting up git and present it on 02/05/2008 (Friday) for group consensus.

4. Review of M1

- Quite successful- got 5 out of 6 tickets done
- Lack of testing will be addressed in M2
- Everyone did learn something
- Last presentation highlighted that we are not organized

5. Opens

- David said the 3 other machines for the project was cloned during the meeting.
